Programming for Design: Pseudo Code
Daniel Hall: U3201585

Start:

Create HTML document and place sketch.js within script

do
IF mouse clicked THEN
   eyeCheck = "0"
ELSE
   eyeCheck = "1"

loop

End:

Start:

Set up variables (x and y)

do
Create Black Background (640 x 680)

Fill Green
Create Lines for Background

Fill skin colour
Create large ellipse for face
Create two small ellipses for ears
Create vertical rectangle for neck

Fill white
Create two horizontal ellipses for eyes
Fill Brown
Create two smaller horizontal ellipses for eye retinas
Fill Black
Create two smaller horizontal ellipses for pupils

Create two rectangles with rounded edges for glasses
Create lines with thick strokes for glasses frames

Create diagonal line for nose
Create straight line for nose

Fill dark red
Create angled ellipses for mouth
Fill black
Create smaller angled ellipses for mouth
Fill white
Create multiple smaller ellipses for teeth

Fill brown
Create lots of quads in triangle formations to create a beard

Fill green
Create vertical rectangle with rounded edges for body
Fill darker green
Create small rectangle for hoodie
Fill black
Create lines jacket zip and arms

Fill white
Create ellipses and rectangles for jacket cords

Check variable eyeCheck:
If 0 Then draw:

Fill red
Create half ellipses for tongue
Create small ellipses for pupils

Fill white
Create thin horizontal ellipses for eyes

Fill skin colour
Create rectangle for body

Fill purple
Create two small ellipses for nipples

Fill Orange
Create Lines for Background

Remove beard

Loop

End:
